

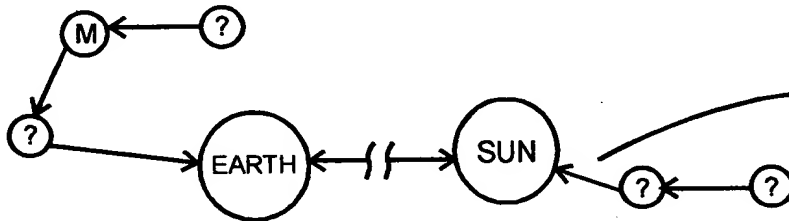

FIG. 1

The relationship of the Sun to the other planets and their moons has been a subject of interest to both astronomers and astrologers over the past four centuries.

However, it has been only in the last fifty years with the advance of telemetry that this relationship has been truly understood.

Try to consider the following alignment:

This is the recorded array that Doctor Homer Zarcharias was given in 1878 is . . . Strassburg by his friend and mentor, Clyde Klutz. Homer's solution changed the whole relationship between astronomy and astrology for the four centuries.
